Signature (Required) \_\_\_\_\_ Date \_\_\_\_\_

### SECTION A

If your system(s) produces tailwater, type or print in the spaces provided below the legal description of each point of diversion to the nearest 10 acres, and the number of acres under chemigation. Your plan should describe the precautions taken and methods used to assure that water containing pesticides, fertilizers or other chemicals, or animal wastes, does not leave the area intended for treatment. Then, DRAW A DIAGRAM of each irrigation system listed on this sheet: show the location of each wellhead or point of diversion, pivot point(s), tailwater pit(s), and the direction of flow/slope.
